

The following are instructions for compiling and running the Frogger game.

1. Open the `frogger.c` file in VS Code.
2. In the terminal, ensure you are in the directory in which `frogger.c` is located.
3. To compile the program, run the command `gcc -o FroggerGame frogger.c` in the terminal.
4. To run the program, run the command `./FroggerGame` in the terminal.
5. Play the game, good luck!
6. If you lose, simply run the command `./FroggerGame` in the terminal to start again.
